**SESSION DESCRIPTION:**

Today's trend is revolving around computerization. With the development of technology and science theory, it has slowly begun to digitize and educate conventional medicine with biotechnology as its ranking. And smart healthcare has emerged that embodies a new wave of information technology. Smart healthcare is not only a simple advance in technology, but also a multi-level, all-round change. Smart healthcare revolves around many sectors, such as the Internet of Things (IoT), big data, cloud computing and artificial intelligence, to turn the conventional medical system in an all-round way, making healthcare more effective and more convenient. Papers with new research results and new products or concepts are encouraged for submission.

**RECOMMENDED TOPICS:**

Topics to be discussed in this special session include (but are not limited to) the following:

- Artificial intelligence in Healthcare
- IOT in Healthcare
- Image/ video processing for Healthcare
