SESSION DESCRIPTION

This special session is dedicated to the research related to the various smart and futuristic technologies. In other words, the innovations related to the various fields such as Image Processing, IoT, Artificial Intelligence, Machine Learning, Wireless Communication, Optical Fiber Communication, Optimization, Robotics, RF and Microwave, Intelligent Systems, Renewable Energy Resources etc. will be discussed in this special session. This special session will attract the various researchers, academicians, industry experts and research scholars to provide their novel ideas in the areas of various emerging futuristic technologies.

RECOMMENDED TOPICS

Topics to be discussed in this special session include (but are not limited to) the following:

- Image Processing Applications
- IoT and AI for Consumer Applications
- Emerging Technologies in Wireless Communication and Networks
- Next Generation Intelligent Systems
- Thrust Technologies in Optical Communication
- Future Research and Challenges in Optimization Methods
- Trends in Machine Learning
- Designing of Antenna and RF Devices for High-speed Wireless Communication System
- Security and Privacy issues in Smart Systems
- Areas related to Robotics and Automation
- Innovations in Renewable Energy Resources

SUBMISSION PROCEDURE:

Researchers and practitioners are invited to submit papers for this special theme session on **[session name]** on or before **[15th October 2021]**. All submissions must be original and may not be under review by another publication.
