SPECIAL SESSION ON

Recent Trends and Challenges in Machine Learning

One of the technologies that have become more prevalent with time is Machine Learning (ML). With the development of internet technology and artificial intelligence ML has become popular. ML is incorporated in more and more companies like Google, Netflix and Amazon. Even smaller companies use ML algorithms to obtain insights from the data.

There are many innovations and ML trends that may come to the forefront in 2021. With the integration of ML with Internet of Things (IoT) applications in the cybersecurity, Finance, and Medicine industries, ML requirement has being enhanced.

As we reach the end of 2020 and the beginning of 2021, let's see some of the key Machine Learning trends that may change the future for the better, The points are,

1. **Healthcare.**
2. **Cybersecurity:**
3. **Business analysis**
4. **Banking sectors**
5. **Facial recognition**

It's obvious that some trends in Machine Learning are here to stay such as its integration into many fields such as cybersecurity, Finance, and Healthcare. More and more companies are adopting Machine Learning so that this technology is no longer exclusive to just tech giants like Google, Facebook and Microsoft.
